

Photo Adventure 2024

Sea eagles, Milane & Co.

Sea eagles & Co.

Experience an unforgettable photo adventure in the beautiful Feldberg lake landscape and capture the world of white-tailed eagles, Milane and Co. in your photos forever.

Procedure

We deal intensively with the photography of sea eagles, Milanese and everything that challenges us to photographic achievements on the lake. With good luck we also meet the osprey that lives nearby and raises its young. All this makes possible for us Ranger Fred Bollmann, who has been working with the animals for over 20 years. On his electric boat we go out and the birds of prey often wait to get the ejected fish from the water surface at a distance of between 10-30 meters.

The procedure is based on agreement with Ranger Fred Bollmann due to his experience. We have no influence on the weather, the light and the sighting of the birds of prey. We are wildlife on the road! In order to get to the tours, we organise carpooling on site by arrangement.

Benefits
